

Excitement of Science Project...

"Real Hands On..."

This is an **Internet led project**, aimed at promoting the talents of young people, 13-18 years old, who are gifted in the field of Science and Mathematics.

This is about the Future...have you got the imagination and far sightedness to see how encouraging this sort of project in schools ensures our Future?

The project culminates in a day at the Royal Institute in London. **At the Faraday Theatre. A fantastic experience.** Tickets are allocated according to the degree of engagement in the project of the year.

"Science made Fun..."

Pr. William School, Oundle with Professor John Kilcogne.

The original Mad Professor.

The only cost to the Club is **transport** to London on the day. But of course as an **individual Club** you can make more of it.

Look what **teachers say** based on **their pupils experience...**

"The day in London was a **fantastic** experience for all. I think this is one to **remember** for the **rest of their lives..**" Mrs. P Dixon, Head of Science, Pr. William School, Oundle.

Other Rotary Links...

Use this project to foster interest in the **"Thanks for Life"** project...research into polio immunization programme, Rotary International projects, other Youth Opportunities and Citizenship projects, i.e.Interact and Rotoract.

"What Schools say...

"Thank you so much for inviting us to be part of the Excitement of Science project. The students who took part thoroughly enjoyed this experience...the day in London was a fabulous experience for all.. I think this is one to remember for the rest of their lives. Please pass on our thanks to all in the Rotary Club who were involved in the organization of this event and particularly to Oundle Rotary Club for their sponsorship" Mrs Pauline Dixon, Head of Science, Prince William School, Oundle.
